

# 10 Old Friends

When I was a youngster I was always taking cold, and nights would bark a wolf. But mother always had a bottle of Cherry Pectoral at hand and a dose at night would make me all right for the next day. It wasn't long before I had to give it to my own children for the croup, hard colds, whooping-cough, tight coughs, etc., and now they are giving it to their children."

There's nothing so  
bad for a Cough as  
Coughing!
